

Bormio 360 - Tappa 8 - Sentiero dei ghiacci

Malga dell'Alpe - Ponte delle Vacche - Alpe Tresero - Campec - Forni

Hard

13,253 Km

04:21 h

584 m

734 m

Santa Caterina Valfurva is surrounded by valleys marked by deep erosive furrows of glacial origin, cradling glaciers of moderate size, and lined with ancient moraines. From the valleys of Gavia and Forni you can admire these glacial formations,

where water has permeated all phases of the environment, creating an ecosystem in which man has been able to create conditions favorable for living, and for developing tourism. In the nineteenth century, the first forms of modern mountaineering were born, where foreigners using local guides made the first daring ascents of our mountains and glaciers, leading to refuges and bivouacs being built above 3,000 meters, many still in use today.

From the Malga dell'Alpe take the new S519 path that runs above the SS300 road from the Gavia Pass until you reach the unpaved road that takes you across the main road. From here head downhill along a winding path through the forest that leads to the Ponte delle Vacche bridge. From there head up the S561 path towards the disused Alpe Tresero, and continue on to Dosso Tresero where you can stop for a packed lunch and admire the sweeping views over Valfurva. Take the S525 path that leads first to the Alpe Cerena pastures, then on to the Stella Alpina refuge, which offers food and lodging. From here the route continues along a paved road to the Forni refuge.

Start:Malga dell'Alpe **Arrival:**Forni
